Senior Software Engineer Project Manager

Senior Software

JESSICA CLAIRE

✉ resumesample@example.com

☎ (555) 432-1000

📍 Montgomery Street, San Francisco, CA 94105

CAREER OVERVIEW

Experienced Computer Systems Analyst and Project Manager with diverse industry experience in healthcare, engineering, insurance and government. Professional expertise includes systems applications, disaster recovery planning and information protection analysis. Accomplished System Architect adept at designing, implementing, customizing, upgrading and migrating enterprise software and hardware architectures in large server farm environments.

QUALIFICATIONS

- Project management
- Strong collaborative skills
- Capacity and scalability planning
- Optimizing and performance tuning
- Excellent problem solving skills
- Business process improvement
- Forecasting and planning
- Business systems analysis
- SDLC lifecycle implementation
- IS change management

EDUCATION AND TRAINING

ECPI College of Technology
Charlotte, NC • 1999

Diploma: Computer Technician
Computer Technician

MCSE 2000

ACCOMPLISHMENTS

- **Operational Management**
- Identified, recommended and prioritized new Web features and applications in conjunction with business leaders and department managers to go to a paperless environment.
- Developed, coded, installed, tested, debugged and documented Web applications.
- **Project Management**
- Managed complex BI/DW deployment programs, facilitating acquisition of business requirements.
- Prepared design specifications, developed reporting and analytics, tested and managed user adoption.
- Created a secure website for the New York City Department of Environmental Protection (NYCDEP) that would allow the users to upload a document and track the status until final. It also incorporated several levels of user permissions driving viewable content on the site. Created and managed the entire database, program and hardware architecture design and implementation.
- **Team Collaboration**
- Brainstormed development team evolution strategy and deployed best practices, such as team programming, test-driven development (JUnit) and repeatable builds (Subversion, Hudson, IBM WAS 8.5ND).
- **Requirements Analysis**
- Completed business requirements analysis including the evaluation of systems specifications for client Web site two weeks ahead of deadline.
- **Specialized Accomplishments:**
- 2005: The LAN Administrator of the URS Paramus office was suddenly discharged, URS Corporate Offices in San Francisco specifically asked for my immediate assistance in standardizing the office network and procedures. Traveled to the office to document the entire network and associated infrastructure, and instituted new security, backup, and disaster recovery protocols. Although five days were scheduled for this task, it was completed in two.
- 2003: Moved URS Buffalo office of 185 people, inventoried all telephony and IT assets, tore down,

moved them, and set it all back in 3 days so that URS could conduct business with no outages. Handled voice and data vendor relations during this project.

WORK EXPERIENCE

Hcl Technologies Ltd. - Senior Software Engineer / Project Manager

Liberty, TX • 05/2007 - Current

- Managing migration/upgrade/coding projects for large health insurance client.
- Instrumental in redesigning an automated architecture to QA all corporate email sent to customers.
